

Dr Luke Dancy

MBBS BSc PhD MRCP

Scans, tests, services & treatments available

- Coronary angioplasty with stent insertion
- Cardiology

NHS Practices

Medway Foundation Trust and King's College Hospital

Professional Profile

Trained in South London, Dr Dancy specialises in all aspects of general cardiology specialising particularly in diagnosing and treating diseases of the heart arteries.

He is trained in interventional Cardiology and performs all types of stenting procedures (simple, complex, emergency and chronically occluded) at Medway and King's College Hospitals.

He undertook his post graduate degree at King's College London and continues to be actively involved in academia. He believes that following diagnosis, treatment, if specialist should be performed by specialists, so uses his network of expert colleagues to ensure all his patients get the best possible care.

Special Interests

Diagnosis and treatment of all common Cardiology problems including:

- 12 lead ECG
- Echocardiography
- 24 Hour ECG monitoring
- 24 Hour Blood pressure monitoring

- Diagnostic Angiogram
- Stent implantation (PCI), both simple and complex
- Implantable loop recorder insertion and removal
