

Dr Maadh Aldouri

MB, ChB, FRCPath, FRCP

Scans, tests, services & treatments available

- Haematology

NHS Practices

Maidstone & Tunbridge Wells NHS Trust and Kings College Hospital

Professional Profile

I have extensive experience in the management of Haematological disorders and supervision of Haematology laboratory and blood transfusion. I have been head of Haematology services at Medway Maritime Hospital 1999-2022, and have regular clinical sessions at King's College Hospital.

I am highly skilled in the management of haematological malignancies, investigation of patients with anaemia or abnormal white cell and platelet disorders, in addition to the management of patients with thrombotic complications.

I follow national guidelines in management of patients, and present them in regional multidisciplinary meetings. I carry out bone marrow examinations for diagnostic and follow up purposes, and arrange chemotherapy delivery privately when indicated. I also carry out venesection procedure for management of polycythaemia or iron overload (hereditary haemochromatosis).

Special Interests

Chemotherapy; Myeloma; Leukaemia; Lymphoma; Myelodysplasia; Myeloproliferative neoplasms; Stem cell transplantation; anaemia; Blood transfusions; general haematology; hemochromatosis; Iron deficiencies;

thrombocytopenia; thrombotic disorders; platelets disorders; pulmonary emboli. Deep vein thrombosis (DVT); Anticoagulation
