Professional Profile

Anne Henderson is currently available for virtual telephone/Zoom consultations during the Covid-19 outbreak. Please enquire directly with her Admin Team.

Anne has been a Senior Consultant for more than 20 years, and spent 17 years as an NHS Consultant, following a medical degree at Cambridge University and postgraduate training throughout the South East.

She is one of only 180 British Menopause Society Accredited Specialists in the UK, recognising the higher level of training, expertise and ongoing clinical workload which this group of specialists undertake. Anne is passionate about women's health issues, particularly menopause and HRT, and has decades of experience carrying out research and running specialist menopause clinics. Anne believes in offering an exceptional quality of care to all women, regardless of cost, and her secretary can provide details of payment packages upon request.

She is also available for a wide range of general gynaecology, including heavy menstrual bleeding, PMS, PCOS and vulval disorders.

Miss Henderson's website is www.gynae-expert.co.uk and she can be followed on Twitter (@gynae-expert) and Instagram (gynaeexpert).

Miss Henderson will be opening her dedicated Women's Health Clinic in Tunbridge Wells, **The Amara Clinic**, in late spring 2021, but will continue her practice at both KIMS Hospital and Sevenoaks Medical Centre where she will be available for outpatient appointments and surgical procedures.

She is delighted to announce the publication of her new menopause book in association with Dorling Kindersley "Natural Menopause" published on 4th March 2021.
