Scans, tests, services & treatments available

- Wisdom teeth extraction surgery
- Oral and maxillofacial surgery

NHS Practices

Queen Victoria Hospital NHS Trust

Member of the West Kent Head & Neck Cancer Multidisciplinary Team

Professional Profile

Mr Gulati is appointed as Consultant Oral and Maxillofacial Surgeon at the renowned Queen Victoria Hospital NHS Foundation Trust, East Grinstead with a specialist interest in head and neck oncology and microvascular reconstruction. He is a core member of the West Kent Head & Neck multidisciplinary team. He is also an Executive Officer of European Association for Cranio-Maxillo-Facial Surgery (EACMFS).

He has a keen interest in promoting higher education, and regularly lectures nationally and internationally and holds workshops in the fields of oral and maxillofacial surgery (OMFS) and implantology. Mr Gulati is the Training Programme Director of OMFS that covers Kent, Surrey and Sussex.

Mr Gulati undertook his advanced dental implant training in South Africa, USA and the United Kingdom. He undertakes complex implant cases using the renowned Straumann & Bicon implant systems and for patients suffering bone loss where bone grafts and sinus lifts are possible to allow for implant placement.

He has contributed to a number of publications, ranging from Head & Neck Cancer Research to Litigation in NHS Oral & Maxillofacial Surgery and is also the section editor for the Journal of Cranio-Maxillo-Facial Surgery.

In his spare time, Mr Gulati enjoys photography and scuba diving in various parts of the world. His other hobbies include golf, running, cycling and watching his children play sport. Having lived next door to the Wimbledon lawn tennis club, his keen interest in tennis is understandable although he says he is far from centre court material!
