Medway NHS Foundation Trust

## Professional Profile

Mr Ali Abdelwahab is a fellowship-trained consultant orthopaedic surgeon specialising in shoulder and upper limb surgery. With international training in Egypt, Germany and advanced fellowships training in the UK, he brings over 20 years of surgical experience.

Mr Abdelwahab provides expert care in shoulder arthroscopy, joint replacement, trauma, and complex upper limb reconstruction. He is known for his meticulous surgical technique, use of modern minimally invasive procedures, and personalised patient care.

From managing rotator cuff tears and shoulder instability to treating elbow and hand injuries, Mr Abdelwahab is committed to achieving excellent outcomes, reducing pain, and restoring function—helping patients return to active, independent lives with confidence.
