

# Mr Bassel Zebian

MBBS, BSc(Hons), MRCS(Eng), FRCS(Neuro.Surg)

## NHS Practices

King's College Hospital NHS Foundation Trust

## Professional Profile

Mr Zebian studied medicine at King's College London. He completed his neurosurgical training in London rotating between King's College Hospital, St George's and the Hurstwood Park Neurosciences Centre. He undertook a paediatric neurosurgical fellowship in Alder Hey Children's Hospital. He is currently a consultant paediatric and adult neurosurgeon at King's College Hospital NHS Foundation Trust - one of the busiest in the country and at the forefront of neurosurgical innovation. As well as the treatment of the degenerative spine (slipped discs and trapped nerves), his interests include the management of brain and spine tumours, hydrocephalus, endoscopy and minimally invasive neurosurgery, the management of Chiari malformations and syringomyelia, neural tube defects and tethered cord and the management of spasticity.

Mr Zebian is the lead for undergraduate medicine for neurosurgery and has an active interest in teaching, training and research with a number of national and international presentations and publications.

## Special Interests

Paediatric and adult neurosurgery, neuro-oncology, hydrocephalus, neuro-endoscopy, Chiari and syringomy, elia neural tube defects, tethered cord spasticity and degenerative spine disease including slipped discs and trapped nerves
