- Septoplasty and Reduction of Inferior Turbinates
- Ear, nose & throat (ENT)

NHS Practices

East Sussex Healthcare NHS Trust

Professional Profile

I am a Consultant Ear, Nose and Throat (ENT) / Head and Neck surgeon working in Kent and East Sussex. I have been providing specialist ENT treatment for adults and children as a Consultant for over 20 years. Whilst I treat all general ENT conditions, I have specialised in the treatment of the sinuses, thyroid, parathyroid and skin lesions.

My NHS practice is at East Sussex Healthcare NHS Trust, working from the Conquest and Eastbourne Hospitals. I qualified at St Thomas' Hospital Medical School, London in 1989 and completed specialist ENT training in London and the South Thames region. I am on the General Medical Council's Specialist Register (GMC number 3335534).

I undertook specialist training in Head and Neck surgery at the Royal Marsden Hospital, London, and advanced training in thyroid and parathyroid surgery at the Hammersmith and Charing Cross Hospitals, London. I was awarded a Fellowship by the European Academy of Facial Plastic Surgery and trained at two centres of excellence in Amsterdam and Stuttgart.

Special Interests

- Thyroid / Parathyroid
- Sinusitis
- Skin Lesion Surgery
