MB ChB, MD, FRCOG

## Scans, tests & treatments available

- Hysterectomy
- Vaginal prolapse repair
- Hysteroscopy
- Laparoscopy

## NHS Practices

Darent Valley Hospital

## Professional Profile

Having been a Consultant Gynaecologist for 20 years, my main aim is to use my knowledge to enable patients to make a wise informed choice about their health.

Throughout my career I have worked both locally and nationally to improve the quality of information that patients receive about their health. My website [www.kentgynaecologist.com](http://www.kentgynaecologist.com) provides a wealth of useful information which, along with my guidance, will help you make choices that are right for you.

Having trained in Yorkshire, I moved to Kent in 2000 to take up a Consultant post at Darent Valley Hospital, Dartford. I have led the Rapid Access service for gynaecological cancer since 2006. I jointly run a Urogynaecology service which has twice been awarded national accreditation.

I treat a wide range of gynaecological conditions, including urinary incontinence and prolapse, heavy painful periods, pelvic pain, fibroids, ovarian cysts and vulval conditions.

Over 90% of the major surgery that I perform uses either a laparoscopic or vaginal approach.

## Special Interests

Urogynaecology. Rapid diagnosis of cancer.
