

## Brow lift surgery

As we age, the brow can begin to droop down towards the eyes and create a hood-like effect, often making us look older. In some severe cases, this can cause problems with vision. A simple eyebrow lift procedure will lift the brow area directly above your eyes, tightening any loose skin around the area and removing excess fatty tissue to create a firmer, more youthful appearance.

## Supportive advice to help you make the best decision for you

Your Consultant will be able to advise you on the best options for treatment and guide you toward a decision that is right for your needs.

When you book a consultation, you can choose to have this at KIMS Hospital or Sevenoaks Medical Centre and you will be seen by the Consultant who will perform your surgery, which will take place at KIMS Hospital. Your Consultant will provide you with guidance on the results you can expect from brow lift surgery, the recovery time and the additional information you need to help make an informed decision. They will also follow you all the way through your recovery. This relationship is important to help you get the best possible results.

## FAQs

### What does a brow lift involve?

The brow lift procedure is performed under general anaesthetic and takes between one and two hours to complete. Your Consultant will make three to five small incisions on the scalp to operate on the muscles and fatty tissue behind the hairline. The eyebrows are lifted and held in place with stitches or absorbable clips. The incisions are then either stitched or clipped.

### Where will my procedure take place?

Regardless of where you had your initial consultation, all surgical procedures take place at KIMS Hospital in Maidstone. Most outpatient appointments, including scans and tests, and follow up appointments with your Consultant, can take place at either KIMS Hospital or Sevenoaks Medical Centre.

### How long is the recovery period?

Following brow lift surgery, you will be taken to your room to recover, and it is usual to be able to leave hospital after 24 hours. Our nursing team will advise you of any further actions you should take to aid your recovery, and it is likely that you will have a follow-up consultation after one week.

### What is the cost of private brow lift at KIMS Hospital?

A private brow lift at KIMS Hospital starts from £7,923. You can use private medical insurance or pay for yourself. Flexible payment plans are available to spread the cost.
