

Nipple surgery

There are several reasons you may require nipple surgery including correction of inverted nipples, reduction of large areolas or reconstruction following breast reconstruction and mastectomy. No matter the reason, the Breast Care and Cosmetic teams we work with will ensure you are fully supported throughout your treatment.

Multi-disciplinary breast care to fully support your needs

We work with a team of specialists that are dedicated to breast care and reconstructive surgery. Your Consultant will discuss your needs, along with your previous medical history and any current medication, to help you reach a decision that feels right for you.

Prices & payment

Our cosmetic guide prices are exclusive of VAT. In some circumstances, you will be required to pay VAT for your treatment at the standard rate which is currently 20%. For more information, please speak to our enquiries team on 01622 237727.

Inverted nipple correction
from £3,015

Areola reduction
from £2,180

The above are guide prices only.

FAQs

Where will my surgery take place?

Regardless of where you had your initial consultation, all surgical procedures take place at KIMS Hospital in Maidstone. Most outpatient appointments, including scans and tests, and follow up appointments with your Consultant, can take place at either KIMS Hospital or Sevenoaks Medical Centre.

What does nipple surgery or nipple reconstruction involve?

Nipple surgery procedures can be performed under general aesthetic, so you will be asleep throughout the procedure, or local anaesthetic, where you are awake throughout but the area is numb so you do not feel any pain.

For inverted nipple surgery, the procedure will involve your Consultant cutting around the nipple to separate it from the surrounding tissue and stitching it so that it protrudes outwards.

How long will I need to stay in hospital?

Following nipple surgery, you will usually be able to go home on the same day. Your Consultant will be able to advise you on this during your consultations.

What is the recovery period?

Many people find that they are able to return to most normal activities following nipple surgery, although it is not recommended to do any heavy lifting. Your Consultant will be able to advise you of your recovery period so you know what to expect.
